

# DUNE II

## The Battle for Arrakis

### Installation Guide

Thank you for purchasing Dune II from Eclipse. The DUNE II box should contain the following :

DUNE II Manual  
Eclipse Registration Card  
Program disks 1 to 8 (Eight disks)

If you do not have any of these components, please contact your supplier.

### TO INSTALL TO HARD DRIVE (highly recommended)

To install DUNE II to your hard drive, insert disk one and double click on !INSTALL. A window will now open with the DUNE II icon and two buttons inside. Drag the DUNE II icon from the window to a directory on your hard drive, and then click on the INSTALL button. DUNE II will now install itself onto your hard drive. Once the game has installed the INSTALL window will reappear, click close to complete the installation. DUNE II can be played on three different types of monitor, CGA, VGA and Enhanced VGA for the Risc-PC. Before you play the game, select the monitor type by clicking the middle button on the Dune II icon once it has installed itself onto the icon bar. You will see a menu, choose the appropriate monitor and you are then ready to play. To play DUNE II double click on the !DUNE\_II icon on your hard drive.

### TO RUN FROM FLOPPY DRIVE

To run DUNE II from floppy drive, insert disk one and double click on !DUNE\_II. DUNE II can be played on two different types of monitor, CGA and VGA. Before you play the game, select the monitor type by clicking the middle button on the Dune II icon once it has installed itself onto the icon bar. You will see a menu, choose the appropriate monitor and you are then ready to play. Click on the Dune II icon and the game will start.

We hope you spend many long nights fighting the forces of Dune - good luck! -
